# THE FRAMEWORK for achieving
FASTER BUSINESS RESULTS
without SACRIFICING YOUR CULTURE

Every day you are losing clients to competitors, your employees are finding new work environments, and the culture you've dreamed about is fading farther into the distance. **Why?** Because of **TRUST**.

- **If employees are leaving** – it's a trust problem.
- **If clients are questioning your products or services** – it's a trust problem.
- **If your business is not growing as fast as you want it to** – it's a trust problem.

When you don't solve ground-level trust issues, everyone loses. Even **_great_** leaders and organizations get hindered by trust problems. Silos, turnover, stress, complexity—at the core of *every* business and leadership challenge is trust. The most effective, fast-growing businesses have figured it out. They are building (and keeping!) trust better than the competition.

Trust Edge Leadership Institute provides **the framework for solving the root cause of your organizational health and human performance**—because without trust people and organizations fail.

85%

85% of people believe a **high-trust work environment helps them perform at their best**.
